

Employment Insurance Summary

Prince Edward Island

March 2023

May 19, 2023

Background: The Statistics Canada Employment Insurance Statistics are based on administrative data; the microdata on beneficiaries are collected and provided by Service Canada. The number of EI beneficiaries represents a count of persons who qualified for employment insurance benefits during the Labour Force Survey reference week, usually the week containing the 15th day of the month. This survey is a census with a cross-sectional design. Data are collected for all units of the target population; therefore no sampling is done.

The release of the data includes information on benefits paid, benefit weeks paid, claims received and allowed and the number of beneficiaries along with their characteristics such as age, and gender. For reference purposes, a regular beneficiary is an individual in receipt of employment insurance benefits in a month and is not currently in receipt of special benefits such as maternity, parental, or sick leave.

The following information is a summary for data that is unadjusted for seasonality. Note on Seasonality: *The EI time series is subject to seasonal and/or calendar effects and is therefore, seasonally adjusted. Seasonal effects are the monthly fluctuations which occur more or less regularly from year to year. They result from composite effects of climatic events, institutional decisions or modes of operation which occur repeatedly with some regularity within the year. Calendar effects are related to the composition of the calendar. They include trading-day effects associated with the location of the Labour Force Survey reference week, moving holiday effects associated with non-fixed date holidays such as Easter, and other predictable events from the calendar.*

Employment Insurance- Brief

- The number of regular beneficiaries decreased by 4,000 (-30.5%) when comparing March 2023 to March 2022 and stood at 9,120. Prince Edward Island ranked third highest among provinces in year over year percentage decrease in regular beneficiaries and had ranked tied for third highest in month over month decrease among provinces.
- Males represent 65.2% of the regular beneficiaries; there were year over year and month over month decreases in all three age cohorts (15 to 24 years, 25 to 54 years and 55 years and older).
- Of the 9,120 regular beneficiaries in March 2023, there were 8,200 who did not declare earnings or alternatively, 920 (or 10.1% of the total) who did declare earnings. In March 2022, there were 1,330 (or 10.1%) of the total 13,120 regular beneficiaries who declared earnings.
- In March 2023, there were 2,310 regular employment insurance beneficiaries in the Charlottetown zone while the PEI zone had 6,800 regular employment insurance beneficiaries.
- A year over year decrease in regular beneficiaries was observed in the Charlottetown Census agglomeration (-1,610 or -40.7%), Summerside census agglomeration (-660 or -32.4%) and outside census metropolitan areas (-1,730 or -24.3%).
- March 2023 saw year over year decreases in Prince County (-1,350), Kings County (-740) and Queens County (-1,910).
- Previous versions of this report had occupational data however Statistics Canada has indicated the related data tables are not currently available as Statistics Canada are converting the EI statistics data to the 2021 National Occupational Classification (NOC) standard. It is anticipated this data will be released in June 2023.
